group

- 1** Get into small groups and brainstorm a list of different types of pets that people usually have. After a few minutes, share your list with the class.

- 2** Ask your partner these questions and share their answers with the teacher.

1. Do you have a pet at home? If not, would you like to have one in the future?
2. How do pets make people happy?
3. What responsibilities come with taking care of a pet?
4. Do you think people prefer some types of pets more than others? Which ones?

- 3** Watch the video, then fill in the gaps and answer the question:

Pets are animals that live with people in their \_\_\_\_\_(1).

The most popular pets are \_\_\_\_\_(2).

Other animals can also become \_\_\_\_\_(3).

Some people like to watch \_\_\_\_\_(4) in tanks.

There are various types of \_\_\_\_\_(5) that can be pets.

**What can people do  
with their pets?**

- 4** Sarah, Jake and Emily are sharing their opinions about unusual pets. Match these three opinions with the examples.

Sarah

I think having strange  
pets is cool.

Jake

I don't agree with  
having weird pets.

Emily

I'm kind of unsure  
about having unusual  
pets.

"They're interesting and  
unique. But I don't  
understand how to care of  
them properly. I can't decide  
if it's a good idea or not."

"When I was younger, I had a  
pet lizard named Iggy. He  
was so different and always  
made me happy with his  
funny actions."

"It's not normal to have  
animals like bugs or snakes  
as pets. My friend once had  
a big spider and it really  
scared me!"

**Now, write your own opinion and example, and share it with the class.**
